DESCRIPTORS Academic Achievement; *Community Colleges; Demography; *Enrollment; Profiles; State Surveys; *Student Characteristics; Two Year Colleges; *Two Year College Students
IDENTIFIERS *California

ABSTRACT

A profile is provided of the demographic and academic characteristics of over 1.2 million California community college students who were actively enrolled as of the first attendance accounting period in the fall 1986 term. Sections I and II present enrollments by district and college, focusing on number and percent of full-time, part-time, and noncredit students; student gender and ethnicity; age; credit enrollment by credit unit workload attempted; weekly student contact hours for regularly scheduled census credit classes and total potential hours of attendance for positive attendance classes. Section III looks at district enrollments by type of student (i.e., full-time, part-time, and noncredit), including data on gender and ethnicity, age, high school completion status, level of academic achievement, enrollment status, residency status, citizenship status, and student goal. Appendices provide data from fall 1985. (AYC)

Preface

This is the fourth in a series of Chancellor's Office Reports profiling California community college students. The statistics in this report are grouped according to colleges and districts and provide a basis for analysts and policy-makers to compare changes in student demographic and educational characteristics.

We wish to thank district personnel for their cooperation in submitting student data to the Chancellor's Office. It is only through the efforts of all districts that a report such as this is possible.

District staff should review these tables, not only to perfect data submissions in the future, but also to make suggestions for improving the usefulness and/or presentation of the data. Comments should be directed to the Research and Analysis Unit of the Chancellor's Office at (916) 322-4656. Copies of the fall 1985 *Report on Enrollment* also can be obtained from the Research and Analysis Unit.

Under the direction of Chuck McIntyre, Leonard Shymoniak of the Research and Analysis Unit analyzed the data and prepared the various computer programs that produced the summary tables. Jerry Hudson and Elizabeth Kamrar of the Management Information Services Unit worked with district staff in the collection of the raw data and performed the data processing and maintenance functions.

Introduction

This report profiles the demographic and academic characteristics of California's community college students for the fall 1986 term. The database used for this report is the Student File of the Chancellor's Office Management Information System. This file is a census of over 1.2 million students who were actively enrolled as of the first attendance accounting period for each of the colleges in the system.

The report is divided into three sections, each consisting of a series of tables:

- **Section I** represents student counts and characteristics by districts.
- **Section II** represents student counts and characteristics by individual colleges.
- **Section III** represents student data by district and according to the full-time, part-time, and noncredit status of students. (Students are defined as full-time if they carry 12 units or more, and part-time if they attempt less than 12 units.)

Part-time vs. Noncredit

Starting with this report, a more precise definition is used to categorize students as part-time or noncredit. In prior year reports, students with missing data' for "credit units attempted" were automatically assigned to the noncredit category. We now determine whether the students had any contact hours in noncredit classes. If they did, they are classified as noncredit. If they did not, they are now classified as part-time.

As a courtesy to the reader, we have applied the new definition of part-time to two tables which previously appeared in the fall 1985 report. These "revised" tables appear in Appendix A. The purpose for this display is to provide comparability in definition during the transition period. The reader will note that the effect of this change is an increase in the part-time count, with a corresponding decrease in noncredit enrollment counts.

Data Elements

Each section presents data on student gender, ethnicity and age. Sections I and II also make use of the following elements: units attempted, weekly student contact hours (WSCH) and total potential hours of attendance (TPHA).

Age (Element SE1)[1] is computed from the student's birthdate. The code for *gender* (Element S10) indicates whether the student is male, female, or unreported. Ethnicity is a code (Element S8) representing the student's racial or ethnic background. A student may be classified as American Indian or Alaskan Native, Asian or Pacific Islander, Black, White, Hispanic, Filipino, Other (persons not fitting into any of the previous categories), or Non-respondent (the item is left blank).

The element, *units attempted* (Element SE7), is defined as the total number of units of credit generated by credit courses in which a student is actively enrolled as of the first census. The tables present the number and percentage of students enrolled in each credit unit group. Credit enrollment is a count of the total number of students taking one or more credit courses in that district or college. That is, students enrolled in both credit and noncredit classes are labelled "credit," whereas those enrolled exclusively in noncredit classes are labelled "noncredit."

WSCH (Element S17) is the total number of hours which a student spends in class during the first census week. WSCH is reported only for those students who are actively enrolled in full-term census courses offered for credit. *Total Potential Hours of Attendance* (TPHA) (Element S14) is another measure of contact hours. TPHA is the product of active class enrollments and total scheduled course hours for credit and noncredit, noncensus attendance accounting classes.

Section III includes the use of five additional variables. These are: type of high school education, student academic level, enrollment status, citizenship status, and student goal.

The type of *high school education* (Element S5) refers to the kind of diploma or certificate held by the student. The options include: high school diploma, G.E.D., certificate of equivalency, certificate of California high school proficiency examination, certificate of completion, and foreign secondary school diploma or certificate of graduation. In addition, the student may not be a high school graduates or the high school degree status may be unknown.

The student's *level of academic achievement* (Element S13) is determined by the number of credit units completed at an accredited institution prior to registration for the term. *Enrollment status* (Element S4) is a code which indicates the student's current standing at the reporting college. A new student may be a first-time student or a first-time transfer student. A student who has previously attended the reporting college may be a returning transfer student, a returning student, or a continuing student.

[1] Refers to data element number of the *Data Element Dictionary* issued by the Chancellor's Office.

The *citizenship status* (Element S2) indicates whether or not the student is a United States citizen. If the student is not a citizen, then the kind of visa is noted. Visa types include immigrant, refugee, student, other, and unknown.

The *student's goal* (Element S12) is the educational aim of the student and includes the following variables: transferring to another institution of higher education with or without a degree, aiming for the AA or AS degree in either general or vocational education, or pursuing a certificate or job skills.

In all tables, unknowns for variables other than unit status are excluded for purposes of computing percentage distributions.
